

# Mplus in the cloud

Ian Rothmann

# What is cloud computing?

Cloud computing is the use of computing resources (hardware and software) that are delivered as a service over a network

Many of us already use cloud storage solutions. For instance Dropbox, iCloud etc.

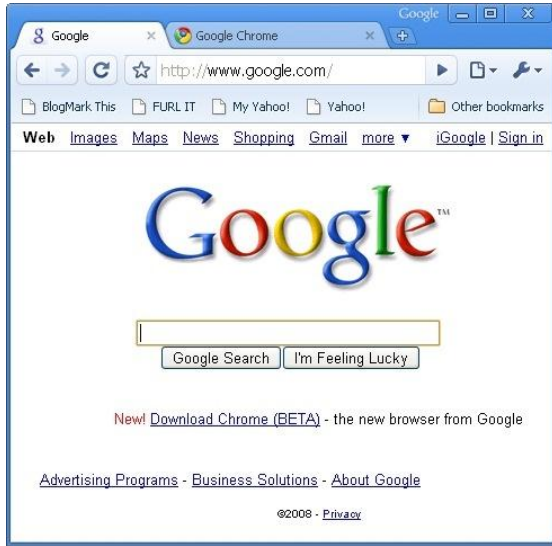

Elastic cloud processing services have also been available since 2002. 10 Years ago!!

# Mplus in the cloud

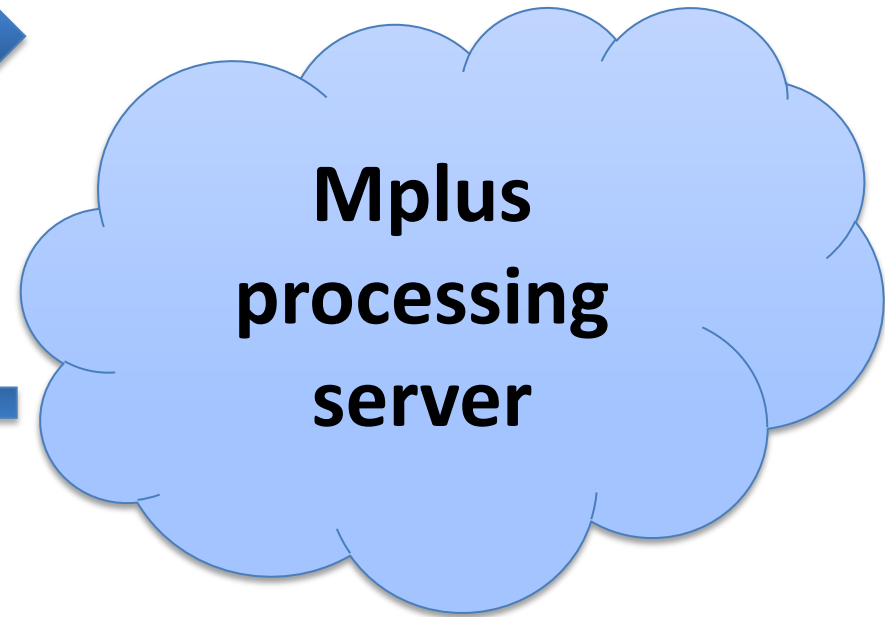

Running Mplus from the internet or via your iPad (or other tablet) is currently not a real possibility, because it is processing intensive

However, using cloud computing makes it a viable possibility

# Architecture

Send input and data

Receive results

**Mplus editor/model builder**  
**Mplus output reader**

# Advantages

Access Mplus from anywhere

When a model is running, your computer isn't occupied. You can run several models simultaneously!
